

Jardin d'Edouard

CRU CLISSON

AOC Muscadet de Sèvre et Maine

Since 1900, they have been cultivating their vines and producing their wines as independent winegrowers. The vineyard is established in Château Thébaud over 16 hectares. Their vines are over 50 years old, grown on the Armorican Massif and cultivated biodynamically on 5 terroirs. Each plot soil and subsoil is composed on a variety of Granodiorite, Gneiss, Gabbro Amphibolite, Sandstone, Schist, Mica Schist, "Granit de Clisson". This variety of soil allows these wines to express very distinctive aromatic profiles. They master the « on lees » maturing method to give a unique style to these Muscadets.

COUNTRY

France

VARIETAL

Melon de Bourgogne

SOIL TYPE

Granite, Schist, Mica Schist, gneiss and slightly altered gabbro

VINEYARD

60 years old

HARVEST

The level of maturity is monitored at each plot to define the optimum harvest date

VINIFICATION

Fermentation Stainless Steel
Aged 36 Months
Aging in Traditional underground vats

TASTING NOTES

Vibrant golden color. On the nose tree fruits dominant with yellow apple, anjou pear and meyer lemon. The palate confirms those fruits and adds an extra layer of depth with a round supple texture
